Sir:

This is submitted in response to the Official Action dated September 27, 2007.

Claims 1-5, 12-14 and 16 stand rejected under 35 U.S.C. §103 over the hypothetical combination of Habon with Xu 2001. The Applicants note with appreciation the Examiner's detailed comments hypothetically applying the combination against those rejected claims. The Applicants nonetheless respectfully submit that one skilled in the art would not make the hypothetical combination. Reasons are set forth below.

The rejection states that the only difference between Xu 2001 and the subject matter of Claims 1-5, 12-14 and 16 is that Applicants' compound is complexed with cyclodextrin. The Applicants agree that Xu 2001 does not disclose cyclodextrin. However, Xu 2001 also does not disclose a molar ratio of the active butylphthalide to cyclodextrin molar ratio of 1:1-10. This is important as will be set forth below.
